

LAKE CHAUTAUQUA LUTHERAN CENTER
COVID-19 PROTOCOLS FOR SUMMER CAMP
AS OF 6/17/22

Based on the latest NY State COVID-19 Best Practices Guidance for Children's Camps, LCLC will adhere to the following safety protocols for the 2022 camping season.

- We encourage up to date COVID-19 vaccination for all eligible children (up to date includes boosters for everyone who is eligible).
- Proof of a negative PCR COVID-19 test result from 1-3 days prior to arrival, or proof of a negative rapid antigen COVID-19 test taken within 6 hours of arrival to LCLC, or proof of a laboratory confirmed case of COVID-19 within the past 3 months will be required. This requirement is for vaccinated and unvaccinated campers alike.
- Campers who are COVID-19 positive or show any symptoms of COVID-19 or other illnesses, should stay home.
- Temperatures will be taken upon arrival. Campers with a temperature of 100.4 F or COVID symptoms will be asked to return home.
- Campers will be able to go mask free in all outdoor areas and when inside their own cabins with their cabin cohort.
- Campers from one cabin cohort will be able to intermix with campers from other cohorts, mask free, when outdoors.
- Intermixing of camper cohorts inside the dining hall will not occur, unless masked. For mealtimes, campers will eat with their cabin cohort while spaced out six feet from other cohorts. Aside from mealtimes, the indoor space of the dining hall will not be used as a gathering space for activities.
- Frequent hand washing and sanitizing will occur before and after meals and all activities that use high-touch items.
- Daily temperature and COVID symptom checks will continue once daily throughout the week.
- Campers who test positive for COVID-19 or have symptoms during the camp week will be isolated until transportation home can be arranged. The NY State Department of Health will also be notified.

We pray that these practices will keep our camp community safe and sound this summer. Thank you for your patience and understanding.
